

Secure and Reliable Payment Processing with X-Charge®

We are proud to announce our secure X-Charge interface with RTO Pro Software that provides your business with a fast and efficient credit card processing solution. X-Charge delivers a completely integrated option that is extremely simple to operate. Any computer on your network can easily process credit and debit cards - every RTO workstation becomes a highspeed credit card processing system. X-Charge's secure integration tokenizes card data, which means merchants more easily meet PCI compliance requirements. Interested? Let us tell you more.
